PROFILE

Concepts: Data Engineer, Data Visualization, Data Modeling, Financial Mathematics
Bachelor of Science in Mathematics with coursework in Mathematical Analysis, Appiled Mathematics and Elementary Statistics. Currently attending a Data Engineering through intensive bootcamp training.

Adept at logical problem-solving and applying mathematical principles to analyze complex datasets and support data-driven decision-making.

EDUCATION

2026 – Present	**Data Engineering Bootcamp (In Progress)** Databricks for Data Engineers Bootcamp 2	Thailand
2017 – 2022	**Bachelor of Science (Mathematics)** Silpakorn University	Nakhon Pathom, Thailand
2012 – 2017	**Benjamarachutit Ratchaburi School**	Ratchaburi, Thailand

EXPERIENCES & ACTIVITIES

2023 – Present **Mathematics Tutor & Develop a tutoring website** Ratchaburi, Thailand

- **Developing** website using the AI system.
- **Create** the student system and the system administrator system.
- Create a system for adding class schedules and courses.
- **Analyzed student data** to identify learning gaps and optimize teaching strategies.
- **Simplified complex concepts** for clear and effective communication.

2021 – 2022 **Staff of Academic Olympaid Camp (POSN2)** Silpakorn University

- **Collected and cleaned** student data from Excel (survey responses)
- **Built interactive dashboard** using Looker Studio
- **Analyzed** food allergies, medical conditions, and insurance data
- Supported planning and risk management using data insights

2020 – 2022 **Student Council** Faculty of Science

- Assisted in **planning and managing faculty events** with large student participation
- Promoted to vice leader in 2022

Research Project

2026 **Automated Ethereum Data Pipeline & Anomaly Detection** Independent Study

- **Developed an end-to-end ETL pipeline** use Python to extract Ethereum with robust error handling.
- **Processed and transformed data** use PySpark and Spark SQL on Databricks with explicit schema definitions.
- **Applied statistical methods** using SQL window functions to systematically detect price spikes and crashes.
- **Designed dashboard** to visualize for data-driven insights.

2022 **Injectivity and quasi-injectivity of products of some polynomials and Dedekind psi function** Undergraduate Research Project

- **Applied MATLAB** to analyze numerical patterns and detect duplicate function outputs
- **Performed data** matching and validation using Excel
- **Documented findings and presented** analytical results in a structured format

SKILLS

- **Data Engineering**: ETL/ELT Pipelines, Data Modeling (Star Schema), Delta Lake
- **Data Analysis**: Exploratory Data Analysis (EDA), Statistical Analysis, Data Cleaning
- **Data Visualization**: Looker Studio, Databricks, Excel
- **Programming**: Python (NumPy, Pandas, PySpark), R, MATLAB, SQL
- **Tools**: Databricks, Excel, PowerPoint, LaTeX, AI
